WHAT'S THAT?

This patented resealable top film is suitable for any thermoforming or thermosealing machine, supplied directly in reel and ready to be packaged. It can also be used on different materials such as **PET, PE, OPP**. Depending on the needs of the product this film can be macro or laser perforated, it can be used in modified atmosphere and the product safety can be guaranteed by tamper-evidence. Smile 2 LITE is suitable for industrial packaging on thermoforming and heat sealing machines.

Can be used in different sectors

- | | | |
|--|---|--|
|  CONFECTIONERY |  DRIED FRUIT |  CHEESE |
|  FRUIT & VEGETABLES |  SALAD |  AROMATIC HERBS |
|  MEAT & COLD CUTS |  BAKERY PRODUCTS |  TOMATOES |
|  DAIRY |  SNACKS |  SPINACH |

ADVANTAGES

1. Less food waste (about 8%)
2. Better product preservation, thanks to the guaranteed reclosure more than 20 times
3. Easy to open and use
4. Avoid additional packaging
5. Visual and commercial appeal
6. Avoid the lid, thus reducing the amount of plastic waste to be disposed of
7. Avoid logistics related to the use of the lid
8. Reduction of CO2 production in production processes and transport
9. Fully customizable in terms of graphics, format, size and opening
10. No need for changes in packaging machines
