WHAT'S THAT?

Green Lite is the reel-ready resealable top-film suitable for direct sealing on **eco-sustainable materials** such as **paper, cardboard** or **wood pulp**. Its main purpose is sustainability, as it is recyclable and peelable very easily from the tray at the end of the use. In addition, the reclosure guarantees a better maintenance of product's freshness. Can be used in all heat-sealing machines without any machine modification. Depending on the needs of the product this film can be also **macro** or **laser perforated**.

Can be used in different sectors

FRESH FRUIT

VEGETABLE

ADVANTAGES

1. Recyclability
2. Sealing on eco-friendly materials
3. Easy-peel at the end of the use
4. Less food waste (about 8%)
5. Better product preservation, thanks to the guaranteed reclosure more than 20 times
6. Easy to open and use
7. Avoid additional packaging
8. Visual and commercial appeal
9. Avoid the lid, thus reducing the amount of plastic waste to be disposed of
10. Avoid logistics related to the use of the lid
11. Reduction of CO2 production in production processes and transport
12. Fully customizable in terms of graphics, format, size and opening
13. No need for changes in packaging machines
